Professional Summary

Results-driven Clinical Programmer with experience around 6 years in Electronic Data Capture (EDC) systems, clinical database programming, and validation. Skilled in building and maintaining clinical studies using tools like Veeva Vault and Medidata RAVE. Strong understanding of GCP guidelines, CDISC standards, and SOP compliance. Proven track record of delivering validated datasets, eCRF builds, and post-production support.

Core Competencies

Clinical Study Build & Design, eCRF Development & Validation, Edit Check Programming, UAT Testing & Documentation, Post-Production Change Management, Veeva Vault, Medidata RAVE, Regulatory & SOP Compliance, Data Quality & Discrepancy Management

Professional Experience

Business Process Lead (Clinical Programmer) – Tata Consultancy Services

Bengaluru | India | May 2022 – Present

EDC Tool: Veeva Vault

- Designed, developed, and validated CRFs (Case Report Forms) in Veeva EDC ensuring compliance with CDISC/CDASH standards.
- Led end-to-end study build activities in Veeva EDC across multiple therapeutic areas.
- Programmed and validated edit checks and dynamic rules to identify data inconsistencies.
- Managed over 90 post-production change studies and supported migration studies.
- Led calls with study teams for eCRF review and approvals.
- Conducted developer-level QC for edit check rules and discrepancy management.
- Authored and executed test scripts, validation documents, and UAT plans.
- Performed UAT testing, identified issues, implemented fixes, and conducted retesting.
- Implemented SDV (Source Data Verification) plans, review plans, and risk-based monitoring controls in Veeva.
- Documented all programming activities in line with 21 CFR Part 11.
- Trained and mentored junior programmers on Veeva development standards and best practices.
- Conducted code reviews, knowledge-sharing sessions, and team mentoring to improve development standards.
- Drove process improvements by automating repetitive programming tasks and enhancing study build efficiency.

Clinical Data Manager – YouV Research Pvt. Ltd.

Bengaluru | India | Jan 2019 – May 2022

EDC Tool: Medidata RAVE

- Built and maintained clinical study databases, programmed edit checks, and custom functions.
- Contributed to best practices documentation and quality checklists.
- Performed database validation, eCRF review, and UAT based on testing scripts.
- Ensured compliance with Data Management Plans and regulatory standards.
- Coordinated effectively with the CDM team and stakeholders to meet project timelines.

Education

Integrated M.Tech in Computer Science and Technology

Central University of Karnataka | 2014 – 2019

Technical Skills

EDC Platforms: Veeva Vault, Medidata RAVE

Tools: Microsoft Excel, UAT & Validation Documentation

Other Tools: Power App, eTMF, SORT Tool, Smart Sheet
