SENIOR CLINICAL DATABASE PROGRAMMER

Accomplished Clinical Database Programmer with over **10 years of experience** in Protocol reviewing, designing, developing, and maintaining clinical study databases for global Phase I-III trials. Expertise in EDC systems such as Veeva and Inform Central Designer, alongside strong proficiency in edit check programming and comprehensive study documentation. Recognized for delivering projects with precision and compliance, consistently meeting deadlines in dynamic pharmaceutical environments. Adept at collaborating with cross-functional teams to ensure seamless integration and execution of clinical data solutions. Motivated Database Developer with a background in devising, negotiating and defending the tables and fields provided in the database. A determined employee with leadership qualities, great communication skills and a strong work ethic.

KEY SKILLS

- SQL, Prompt engineering
- Clinical Database Design & Programming
- EDC Platforms: Veeva, Inform Central Designer, Data Management Workbench
- Edit Check Programming & Validation
- Study Documentation & Regulatory Compliance
- Data Quality Control & UAT
- Cross-functional Collaboration

CAREER HIGHLIGHT / ACCOMPLISHMENTS

- Pursuing a six-month certification in Agentic AI and Automation, focusing on implementing intelligent automation, AI-driven workflows, and process optimization strategies.
- Enrolled in a comprehensive six-month program covering Python, Power BI, Tableau, and Microsoft Power Apps, enhancing capabilities in data analytics, business intelligence, and AI-powered automation.
- Preparing for the Google Professional Certification in Automation, specializing in designing automation solutions for Microsoft Office 365 and related ecosystems.
- Reviewed various Protocols across different phases and developed studies to ensure methodological rigor and regulatory adherence.
- Achieved zero findings across multiple internal and client audits, showcasing excellence in compliance, quality control, and audit readiness.
- Optimized workforce performance metrics by transitioning FTE and productivity assessments from daily to automated weekly reporting, improving efficiency, accuracy, and data visibility across teams.
- Led and restructured the Study Design Team, fostering a continuous improvement culture focused on cycle time reduction, process efficiency, and real-time documentation.
- Designed, programmed, and validated complex study builds with zero post-production errors, ensuring high-quality data integrity, regulatory compliance, and operational excellence.
- Developed and implemented a therapeutic area-specific library of study forms and validation checks, driving standardization, cross-study reusability, and reducing design-to-production timelines by 30%.
- Achieved measurable improvements in project delivery timelines, resource utilization, and data consistency.

PROFESSIONAL EXPERIENCE

NOVO NORDISK, BENGALURU, INDIA

JAN 2024- OCT 2025

Veeva Standards Developer

Apr 2025- Oct 2025

- Collaborated across all phases of the standard eCRF development lifecycle—from requirements gathering and design through UAT and production release—ensuring high-quality, compliant, and audit-ready database builds.
- Designed and developed customized eCRFs in Veeva EDC, aligned with Oracle InForm standards, applying consistent item naming conventions to enable accurate data mapping and seamless SDTM domain integration.
- Programmed, validated, and optimized standard dynamics, edit checks, and derivations within Veeva EDC to enhance data accuracy, protocol compliance, and system reliability.
- Performed peer reviews and functional testing to verify eCRF accuracy, integrity, and compliance with approved design specifications prior to production deployment.

Senior Clinical Database Programmer

Jan 2024- Oct 2025

- Led end-to-end design, build, and deployment of clinical databases for multi-country trials using Oracle InForm and Veeva EDC platforms, ensuring accuracy, compliance, and scalability.
- Programmed dynamic eCRFs, edit checks, and derivations in accordance with approved functional specifications, enhancing data integrity and protocol adherence.
- Validated and deployed clinical databases, performed User Acceptance Testing (UAT), and resolved all identified issues to ensure high-quality, production-ready study builds.
- Managed comprehensive study documentation, ensuring audit readiness, regulatory compliance, and consistent Good Clinical Data Management Practices (GCDMP) across projects.
- Delivered complex, multi-phase studies within tight timelines, consistently recognized for quality excellence, reliability, and on-time delivery.

ACCENTURE, CHENNAI

JAN 2015- JAN 2024

Senior Study Designer and Programmer (EISAI)

- Reviewed Protocol and Protocol Concept Sheet (PCS) to identify required visits, eCRFs, and edit checks for study design and setup.
- Conducted EDC kick-off meetings with cross-functional and client teams to review visit structures, form layouts, and edit check specifications for study development.
- Designed and developed eCRFs and visit structures within the EDC tool, ensuring alignment with study requirements and clinical data management standards.
- Authored and implemented dynamic expressions and edit check programming as per approved specifications to ensure accurate data capture and validation.
- Conducted online screen reviews with the client's study team to demonstrate dynamic workflows and ensure study design accuracy prior to deployment.
- Validated and deployed study build packages to the production server following internal quality and compliance protocols.
- Performed rigorous quality control (QC) checks to confirm that each study build adhered to approved functional specifications and sponsor requirements.
- Drafted and executed User Acceptance Testing (UAT) scripts, facilitating testing activities and ensuring issue resolution prior to go-live.
- Resolved and updated issues identified during QC and UAT phases, including corrections to study databases, eCRFs, and edit checks.
- Created and maintained project timelines in line with client requirements, ensuring timely delivery of milestones and deliverables.
- Managed study documentation, including creation, updates, maintenance, archiving, and audit readiness on a timely basis.

- Monitored and measured team productivity, quality performance, and capacity utilization, ensuring optimal resource allocation and continuous process improvement.

EXCEL LIFE SCIENCES PVT. LTD, NOIDA/DELHI

MAY 2014- JAN 2015

Clinical Research Coordinator

- Coordinated study activities for regulatory compliance; managed documentation and audit responses.
- Strengthened relationships with study sites, sponsors, CROs, and vendors.
- Summarized key findings and ensured data quality across multiple ongoing studies.

QUEST LIFE SCIENCE PVT. LTD, TAMBARAM | NOVEMBER 2012 - APRIL 2014

NOV 2012- APR 2014

Clinical Research Associate

- Monitored bio-study activities for GCP and protocol compliance.
- Performed quality audits and coordinated with Ethics Committees and regulatory bodies.
- Prepared study documents and revised SOPs as required.

EDUCATION

- **Post Graduate Diploma in Clinical Research** | Focus Edu Care Pvt. Ltd, Chennai | June 2012
- **Master of Science in Applied Microbiology** | Hindustan College of Arts & Science, Padur, Kanchipuram | April 2011

TRAININGS/CERTIFICATIONS (OR OTHER SECTION HEADING)

- Certified in Python using AI workshop.
- VEEVA CDMS Certified Study Builder - 2023 (Credentials – CER- 093348).

AWARDS/RECOGNITION

- Star of Business Award for 100% quality delivery across multiple studies, Core Value
- Champion & Star of Delivery Excellence honours, Best Mentor Award; recognized for coaching junior programmers, Multiple client appreciations for data quality and timely results
