

VISHNU PRIYA ANJURU

9502026293 | anjurupriya@gmail.com

PROFESSIONAL OVERVIEW

Clinical Database Programmer with 4+ years of experience working across global clinical trials. I've led multiple studies end-to-end, particularly in oncology and vaccine domains, with a strong focus on building reliable EDC systems, maintaining clean data flows, and ensuring everything is audit-ready. Comfortable working across tools like InForm, and Central Designer.

PROFESSIONAL SKILLS

- Strong experience using **InForm** for eCRF design, edit checks, validation rules, and workflow logic, ensuring all builds align with protocol requirements and regulatory expectations.
- Well-versed in applying **data integrity and quality control checks**, with a focus on compliance with standards like **ICH-GCP** and supporting audit readiness.
- Hands-on experience with **eCRF-to-dataset mapping** and **central coding**, including resolving verbatim term duplications through effective use of encoding specifications.
- Proficient in developing and validating **study-specific edit checks** to ensure accurate, complete, and consistent clinical trial data across multiple phases.
- Solid understanding of **clinical trial workflows**, combined with strong troubleshooting skills to resolve issues in eCRF design, data validation, and cross-functional handoffs.

TECHNICAL SKILLS

Languages : VB Script, SQL, XML, C#, Python
Database : Oracle, MySQL
Tools : Oracle InForm, MedML, Central Designer, DMW, J-Review
Operating System : Windows, Linux

PROFESSIONAL EXPERIENCE

EDC Programmer Oct 2020 – Till Date
Accenture Solutions Pvt Ltd Bengaluru, India

Project Name: MACH1

Client Name: Merck (Accenture Dec 2021 – till date)

Project Description: Merck is a global pharmaceutical, biotechnology, and healthcare company that conduct extensive research and development in various therapeutic areas. It has web-based applications for the clinical trials.

Role: Senior Clinical Database Programming Associate

Tools: Central Designer, DMW (Data Management Workbench), LNMT

Tech Stack: SQL, XML, VBScript, C#

Responsibilities:

- Led development for **3 global PDAM Next Generation studies** (vaccine, ESD, oncology), designing 25+ CRFs and streamlining clinical workflows using DMW, CD, LNMT, and LSH resulting in a 30% improvement in form deployment time and ensuring audit-compliant database builds.
- Conducted comprehensive UAT/system testing for **3 therapeutic area studies**, validating 100+ edit checks and custom functions against SDLC standards; identified and remediated 25+ defects prior to go-live, ensuring clean database lock.
- **Certified peer reviewer** recognized for code quality; performed 50+ structured peer reviews across global trials, reducing production bugs by 30%.
- Provided dedicated **1-to-1 mentorship** to a new joiner in two structured phases, guiding them through end-to-end clinical database programming processes, tools (e.g., InForm, LNMT, RFC), and technical best practices, resulting in successful certification completion and seamless project onboarding.
- Executed 20+ Post Production Changes and study migrations across active trial environments with zero downtime, ensuring version control, traceability, and uninterrupted access for global study teams.
- Configured display overrides in Central Designer (CD) by assigning precise user rights and roles, enabling controlled access and streamlined visibility based on study requirements and user responsibilities.
- Provided on-demand technical support to 5+ cross-functional study teams, resolving 50+ EDC-related issues and contributing to consistent on-time database locks across all assigned trials.

Project Name: Merck Pharma

Client Name: Merck

(Accenture Oct 2020 – Dec 2021)

Project Description: Merck is a global pharmaceutical, biotechnology, and healthcare company that conduct extensive research and development in various therapeutic areas.

Role: Clinical Database Developer

Tech Stack: InForm, SQL, XML, VB Script, LNMT

Tools: InForm, IVRS, External Data Transfer, LNMT (Lab Normal Management Tool)

Responsibilities:

- **Led end-to-end development for 4 global oncology studies** as the Lead Clinical Database Programmer, overseeing complete database build, edit check programming, and study go-live support within tight regulatory timelines.
- Designed and configured **study-specific eCRFs** and programmed complex **Edit Checks** in InForm for 10+ clinical studies, ensuring protocol compliance, data accuracy, and alignment with clinical workflows.
- Applied expertise in **Central Coding** by implementing encoding specifications to classify verbatim terms using standard medical dictionaries like **WHODrug** and **MedDRA**, significantly enhancing coding consistency and review efficiency.
- Configured **LNMT (Lab Normal Management Tool)** to automate population of lab reference ranges into study-specific lab forms, ensuring dynamic accuracy and reducing manual entry risks across global lab sites.
- Ensured **regulatory inspection and audit readiness** by maintaining audit trails, securing data, and validating study documents as per GxP and FDA 21 CFR Part 11 compliance.
- Collaborated with cross-functional teams and business stakeholders to triage study-level issues, propose technical resolutions, and implement study change requests seamlessly.

- Supported **external data transfer** setups and integrated **IVRS systems** for subject randomization and enrollment tracking, facilitating consistent data flow across systems.

ACHEIVEMENTS:

- **Certified Clinical Database Programmer** from Accenture, demonstrating expertise in EDC technologies and clinical data management.
- **Certified in Central Designer Tool**, enhancing protocol design and data management skills for clinical trials.
- **Certified in DMW Tool**, validating advanced knowledge in data management workflows and contributing to efficient clinical trial execution.
- **Achieved peer review certification**, recognizing excellence in code quality and performance.
- Two **Star of Business awards** received for outstanding contributions to project success and innovation.

EDUCATIONAL QUALIFICATIONS

- **B.Tech (Computer Science Engineering)** in 2019 with 72% from Jawaharlal Nehru Technological University Ananthapur(JNTUA)
- **Intermediate** in 2015 with 72% from Vamsi Junior College, Sri Kalahasthi
- **S.S.C** in 2013 with 92% from Siddhartha EM School
